

 LATISSE EXTENSIONS FALSIES CONDITIONER MASCARA

FRINGE BENEFITS

Imagine waking up with camera-ready lashes every day, no fussing with mascara or dealing with smudges. “I think of it as ‘fertilizer’ for your eyelashes,” says [D.J. Verret, M.D.](#), a facial plastic surgeon based in Dallas who prescribes Latisse. The most appreciative users of Latisse are chemotherapy patients. “While the FDA has not yet approved Latisse for use by those with chemotherapy-induced eyelash loss, it is often prescribed for this condition, with great success,” Verret says.
